WORK EXPERIENCE

- I. Web Analyst (August 2017 – September 2019).

Social Media Aide to Hon. Commissioner for Information and Orientation Bayelsa State, Daniel Iworiso-Markson.

Responsibilities: Was among the team behind the Social handle of Bayelsa State Ministry of Information and Orientation on Facebook, Twitter and Instagram. I write Contents, Design graphics and also do research. Aside the routine of developing contents and writing events report, as a programmer, I designed an online system we use to track the number of click a link shared on Facebook or twitter get. I also came up with a strategy we use to spread any content across the country in few minutes. I was in the Situation Room during the 2019 House of Reps and Assembly elections. I designed a system that centralized all the reports received from correspondents in the various Local Government Areas in Bayelsa State for easy visual presentation.

- II. Senior Programmer (August 2015 – February 2017).

Synchron Platforms International, Bayelsa State, Nigeria.

Development Environment: PHP (Code Igniter and Laravel frame work), Java and Python.

Responsibilities: handling of software development projects. Handled several projects including web and desktop applications. The software I developed include an automobile simulation system, Information Management Systems and several websites and blogs.

III. Webmaster (April 2014 – July 2015)

Kaiste Ventures, Publishers of Nigerian Seminars and Trainings.com. Lagos, Nigeria.

Development Environment: PHP (from scratch coding and Framework), Java.

Responsibilities: I worked as an in-house web developer. As a webmaster, was responsible for developing and implementing new functionalities in the website, provision of technical support (trouble shooting and debugging), Application optimization(W3C, Attracta, Google developer tools) and backend interphase programming.
